<b>Controllato:</b>	Michele Bartalini	Data 17/03/2014
<b>Autorizzato:</b>	Massimo Ferrini	Data 17/03/2014

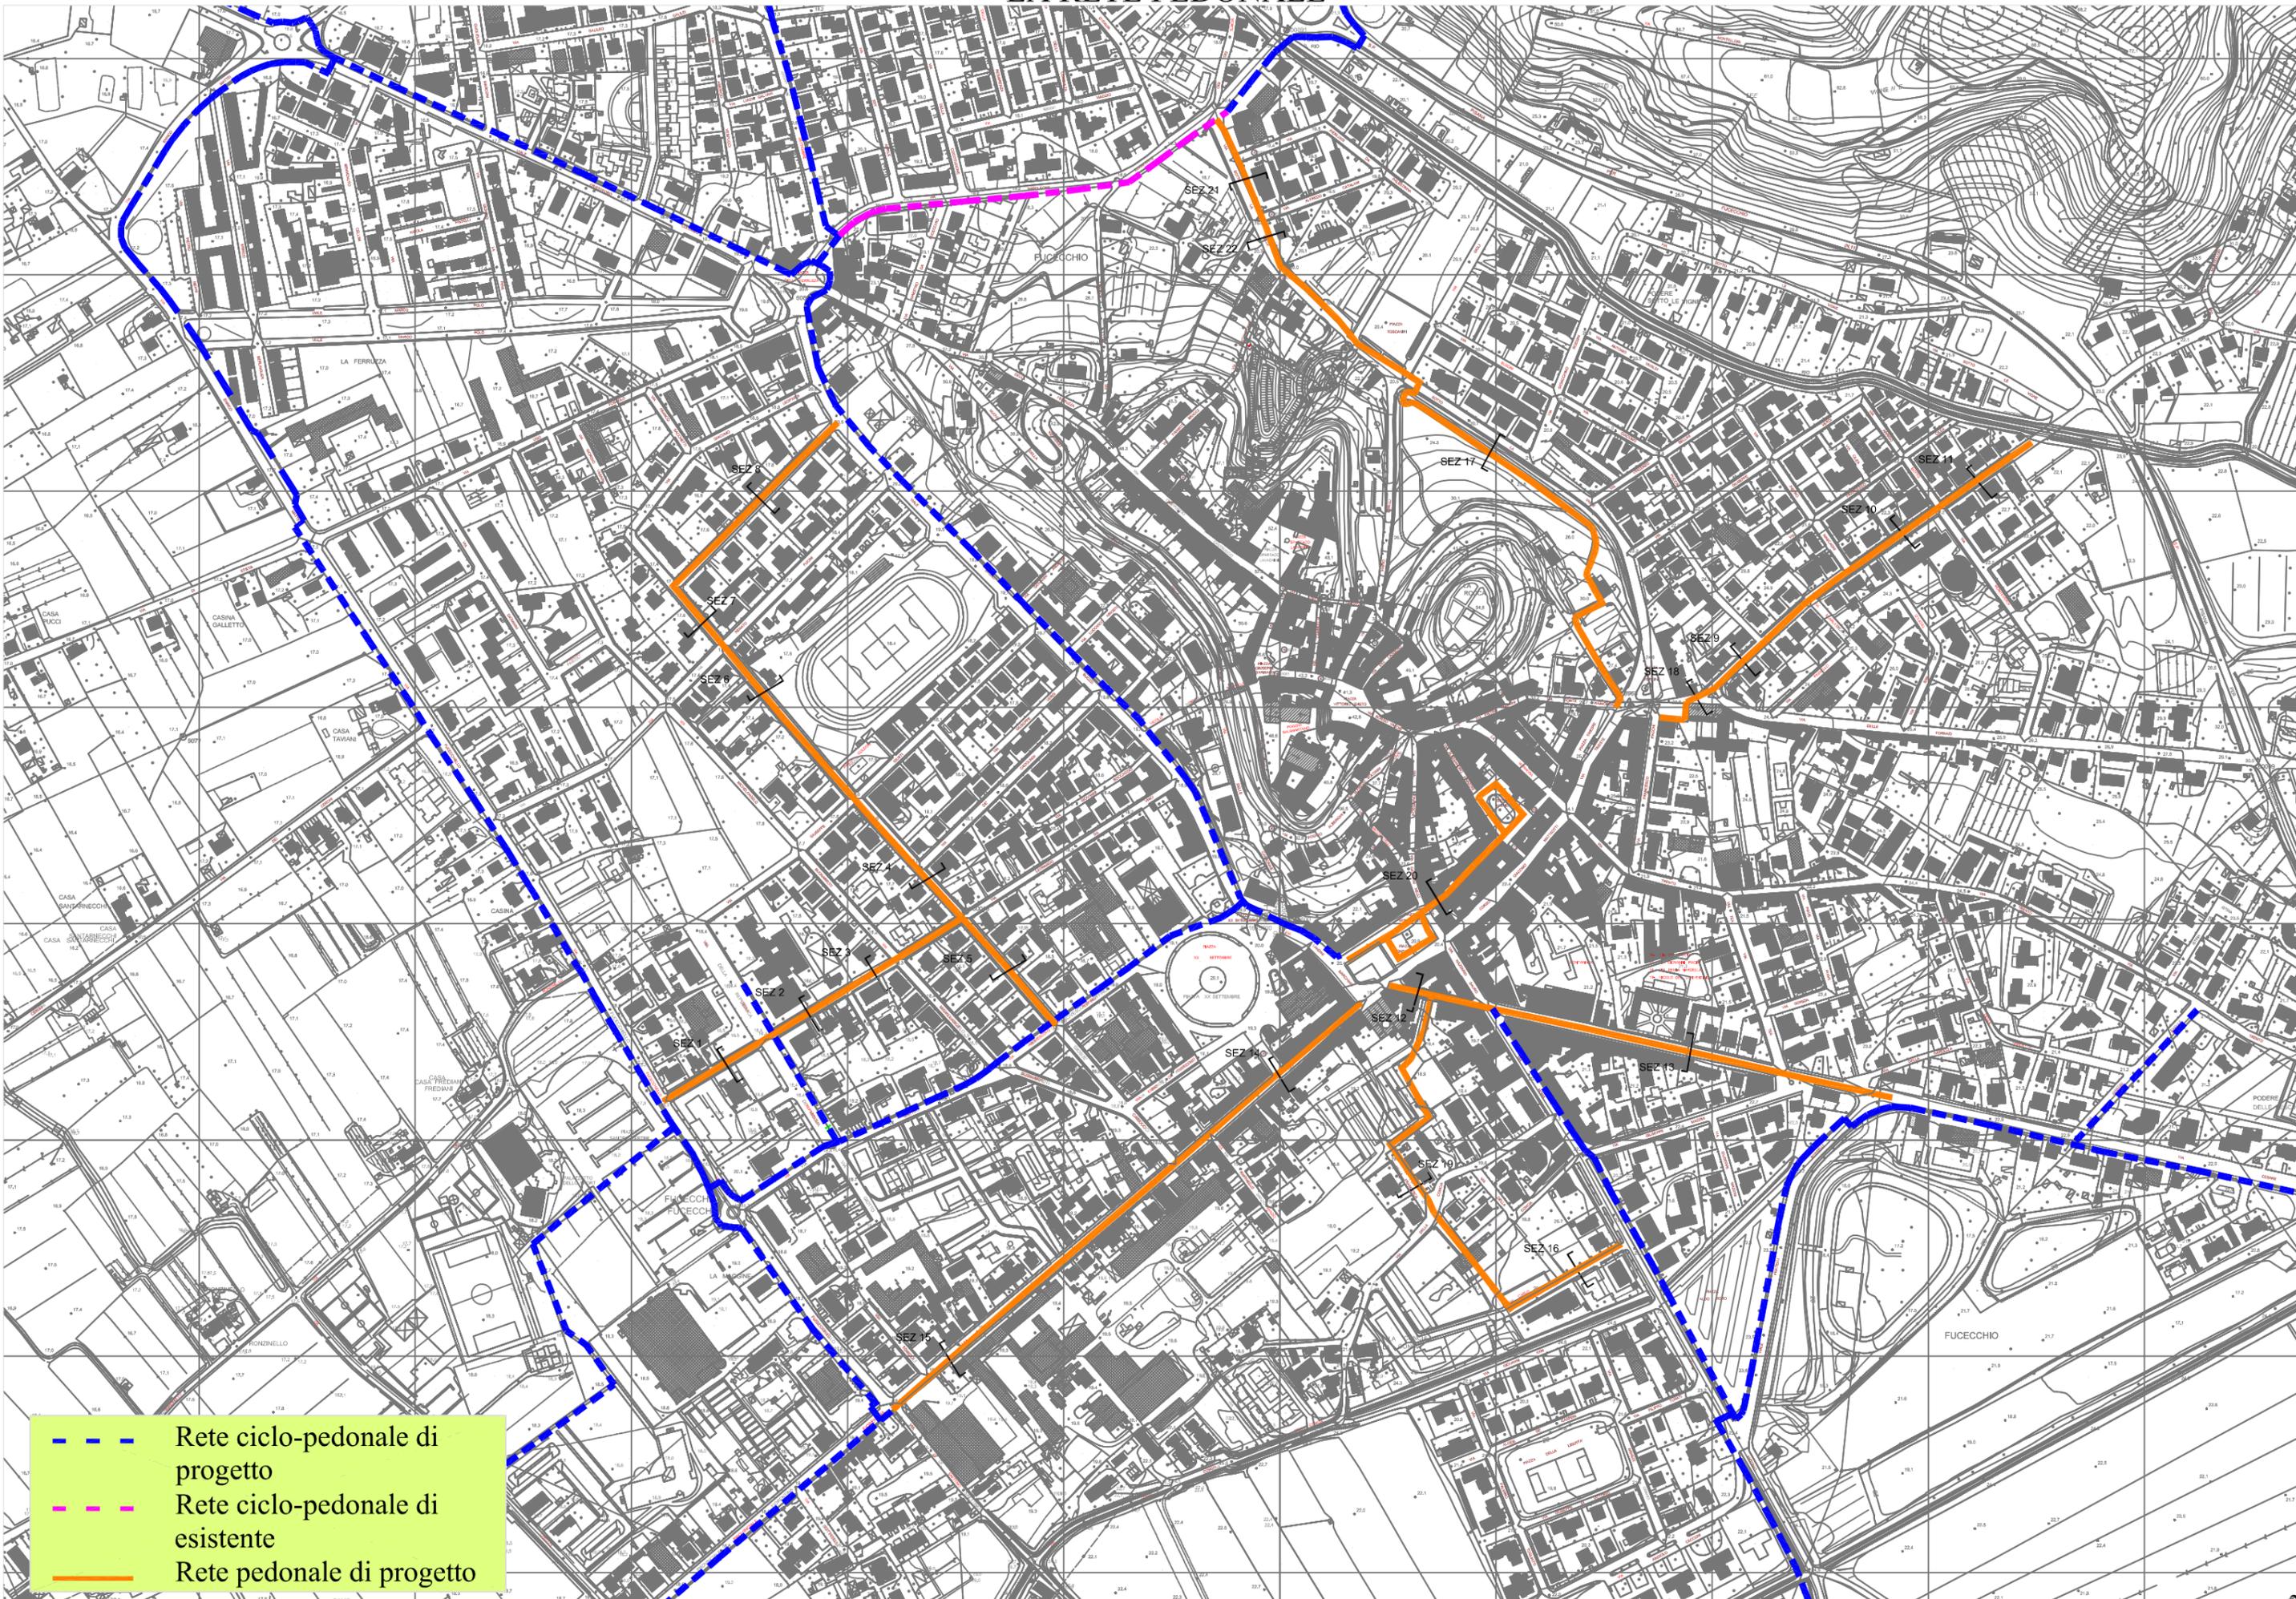

## **PRESENTAZIONE**

### Rete pedonale:

Lo studio dei percorsi pedonali è stato associato ad un rilievo geometrico sul campo corredato di documentazione fotografica allo scopo di avere una valutazione dettagliata sia della natura orografica del terreno che delle sezioni stradali esistenti.

Per ogni singolo tratto sono state definite le criticità determinate in funzione della sezione stradale, e secondo quanto prescritto dal D.M. 5/11/2001“Norme Funzionali geometriche per la ostruzione delle Strade”. La realizzazione dei percorsi di progetto comporta l’eliminazione di circa 11 stalli nel tratto terminale di v. Giordano, e 11 stalli in v. Pier della Francesca che non determina particolari ricadute negative nell’offerta di parcheggio rispetto alla domanda di sosta. In. v. Cairoli la sezione stradale non permette l’adeguamento dei percorsi esistenti.
